JOINT PERMIT APPLICATION COMPLETENESS REVIEW CHECKLIST

In order to be deemed complete, the following items must be provided with the application:

☐ Identified the area of wetlands, vegetated and non-vegetated, directly affected by the project

☐ Identified the areas of proposed excavation and fill

☐ Identified type of equipment and the means of equipment access to the project area

☐ Described measures to be taken during and after alterations to reduce detrimental offsite impacts

☐ Provided the drawing scale on the project map (plan view)

☐ The low tide line included on the plan and profile views

☐ The high tide line included on the plan and profile views

☐ 1.5 high tide line included on the plan and profile views

☐ Provided the quantity of fill required for the project (in cubic yards)

☐ Provided information explaining the rationale for the project solution, and why a living shoreline was not selected if another alternative is proposed (JPA application Part 1, Item 10)
